ACKNOWLEDGEMENTS

We thank Professor Mitra for his guidance and instruction throughout the course, as well as the teaching assistants for their helpful feedback. We also acknowledge the Department of Physics for providing an excellent academic foundation to support this work. This work was completed as part of the requirements for C S 323E: Elements of Scientific Computing at the University of Texas at Austin.

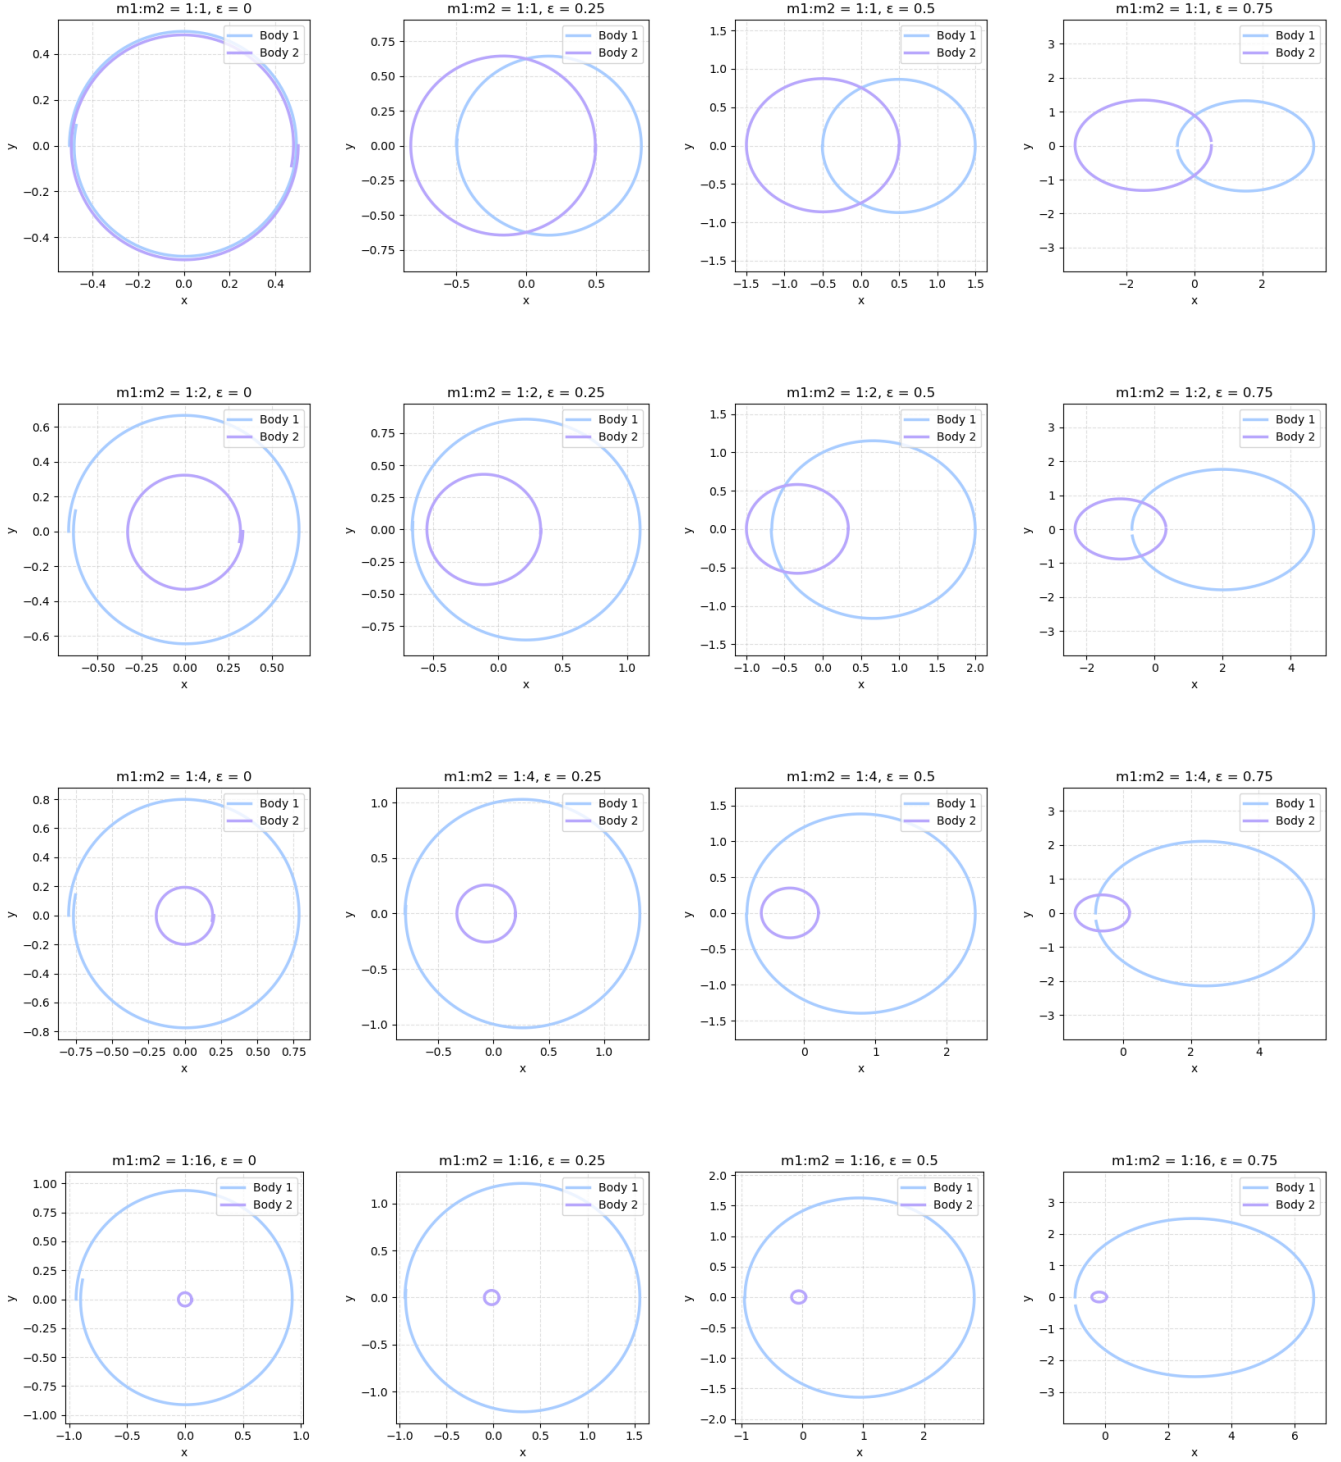

Figure 1. Two-body orbit plots for various mass ratios ($m_1 : m_2$ from top to bottom) and eccentricities (ϵ from left to right).
